Application of IOT　　　　　　　　　　　　**ARDUINO | SENSORS | RASPBERRY PI**

- Designed and implemented IoT-based solutions to monitor and automate processes effectively.
- Acquired skills in programming microcontrollers and integrating sensors for real-time data collection and analysis.
- Developed a strong foundation in IoT architecture and its practical applications.

PROJECTS

REAL TIME DIGITAL NOTICE BOARD SYSTEM USING IOT AND P10 DISPLAY

- The goal of our project is to replace traditional paper notice boards with a digital system that displays real-time updates.
- This system is ideal for schools, offices, hospitals, and public spaces where frequent information updates are needed.
- It can be remotely controlled via the Internet, allowing authorized users to send updates from anywhere.

CERTIFICATIONS

Web Development　　　　　　　　　　　　　　　　FEB 2024 - MAR 2024

- Completed a front-end web development course with Datanerds, specializing in HTML, CSS, and JavaScript for responsive web applications.

Full Stack Development　　　　　　　　　　　　APR 2024 - MAY 2024

- Completed a full stack development course with Novitech, specializing in front-end and back-end technologies for dynamic web applications.
